DOCUMENT HISTORY

Release	Date	Reason of change	Status	Distribution
1.0	03-03-2005	First Draft	Living	Confidential
1.1	11-03-2005	Final delivery notification	Published	Public

1. Document Scope

The PrestoSpace Project started on February 1st 2004. It is intended to push the limits of the current technology beyond the State of the Art, bringing together industry, research institutes and stakeholders at European level to provide products and services for bringing effective automated preservation and access solutions to Europe's diverse audiovisual collections.

This document is a notification of delivery for the project website.

2. Summary of Deliverable

The PrestoSpace Project Web site was opened to the public on 24/2/2004. The URL is <http://prestospace.org>. It is intended to present comprehensive information on the project objectives and efforts and on audio-visual preservation in general.

3. Notification of Delivery

The delivery of D22.1 took place on month 01 of the project (24/2/2004). The URL is <http://prestospace.org>. The project website was designed with the help of INA's Information System team, under the responsibility of Didier Giraud.

This site reflects the activity of the project on the public point of view. An other tool much more collaborative and private has been built up for the management of the project (see D1.2 – Communication platform). All public deliverables and events related to the project are published on the site. We try to make it as multilingual as possible. English, French, German languages are available, Dutch and Italian will be on line pretty soon, and Spanish and Portugese as soon as possible.

The site has a good success. For the first year (in average), the count of Hits is 45,673; Visits count is 2,199; and Pages count is 10,030. (see § 5 - Related Documents and Links)

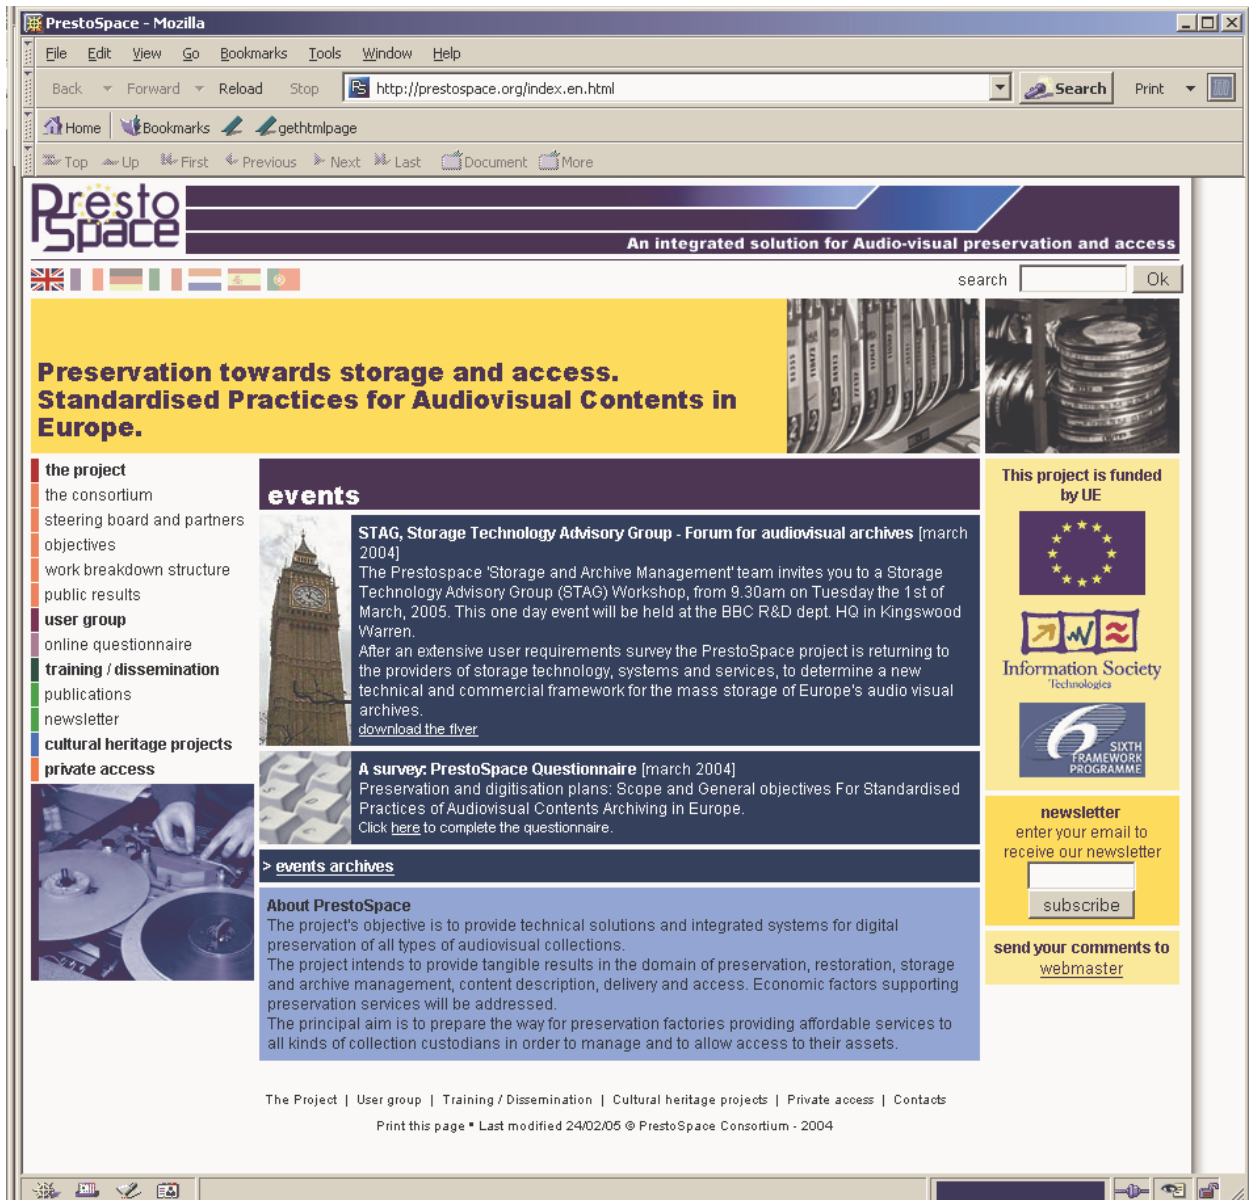

Cross links with other Cultural Heritage FP6 projects have been established.

On 10/3/2005, Google search engine gives 521 single answers for a "prestospace" query.

In parallel, a semestrial public newsletter has been published. On 10/3/2005, more than a hundred people have subscribed to it.

4. Detailed Description of Deliverable

The website structure generally follows the project structure, with sections for consortium description, objectives, work breakdown structure, public results, user group, training and dissemination, publications, links to other cultural heritage projects, sections were added for an online questionnaire for the user group, and for accessing to the public newsletter.
